Professional Experience

Dish Wireless | Frontend developer | (2023-2024)

Dish Wireless provides wireless voice and data services in the United States.

- I developed web applications using the MERN stack (MongoDB, Express.js, React, Node.js), with special emphasis on the integration of Python-based technologies.
- Performed unit testing and debugging to ensure stability and performance of web applications.
- I updated user interfaces using React to create interactive and engaging user experiences.
- Database optimization and exploration for MongoDB.

Finvero | Fullstack developer | (2022-2023)

Finvero is a multilender credit market place that offers multiple credit options.

- I used technologies such as Node.js, Express, Javascript for server-side development, and React, Redux and Tailwind for the user interface.
 - I worked closely with designers and product teams to translate user requirements into technical solutions.
 - I optimized complete web applications, from initial planning to implementation and maintenance.
 - I optimized the architecture of an application, improving the loading speed by 25%.
- Reduced the response time of REST APIs by optimizing SQL queries, resulting in a 20% improvement in performance.
